

## Small Business Consulting

At Grider + Co, we understand the entrepreneurial nature of small businesses, with limited staff and resources. Often these companies cannot afford a full-time staff accountant or a permanent controller; but that doesn't diminish the need for dynamic personnel in those roles. That's where we come in!

Here are some of the roles we have performed for other companies:

- Day to day accounting department functions
- Payroll processing and related tax services
- Accounting system design
- Accounting process improvement
- Financial statement audit preparation
- Financial statement preparation

We want to help you fill in the gaps when personnel are in short supply and transition your company to full control as you grow and add qualified personnel.
